The Auravana Project exists to co-create the emergence of a community-type society through the openly shared development and operation of a information standard, from which is expressed a network of integrated city systems, within which purposefully driven individuals are fulfilled in their development toward a higher potential life experience for themselves and all others. Significant project deliverables include: a societal specification standard and a highly automated, tradeless habitat service operation, which together orient humanity toward fulfillment, wellbeing, and sustainability. The Auravana Project societal standard provides the full specification and explanation for a community-type of society.
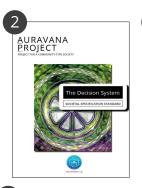

This publication is the Project Plan for a community-type society. A societal-level project plan describes the organized thinking and execution of a socio-technical environment; the societal structuring of community. This project plan identifies humanity's project to create a global community-type society for the fulfillment of that which everyone has mutually in common. This is a planned project for a configuration of society that may be tested in its results at optimally meeting all human life requirements at the global scale. This is a planning and work proposal for an open-source, societal-level project. This document describes and explains a unified approach to actions and results that is likely, given what is known and accessible, to improve all of humanity. This is the plan for societal navigation that specifies an approach, direction, and execution to socio-technical life. The project plan has three core sections: (1) Approach to project execution, (2) Direction of project execution, and (3) Execution of project execution. The standard details the complete, plannable information set for the society's operation, including its approach to action, its direction of action, and its execution and adaptation of action. Herein, these concepts, their relationships and understandings, are defined and modeled. Discursive reasoning is provided for this specific configuration of a project plan, as opposed to the selection and encoding of other configurations. A project plan provides for the formalized project-based development operation of a society, organized in time and with available resources, coordinated to become a societal service system for human fulfillment and ecological well-being.
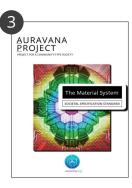

Fundamentally, this standard facilitates individual humans in becoming more aware of who they really are.
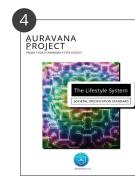

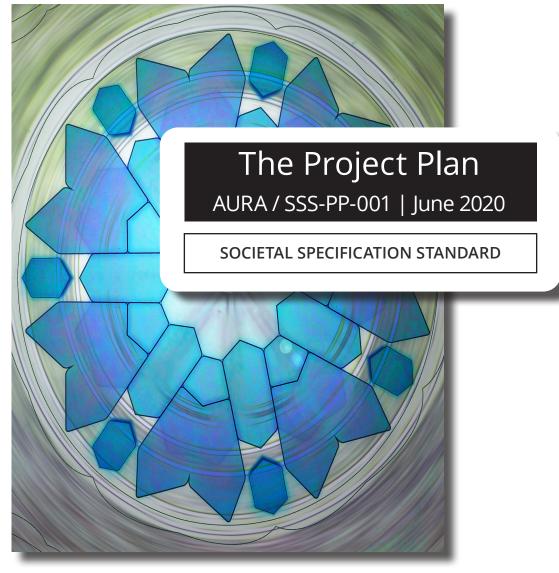

All volumes in the societal standard:

1. AURAVANA PROJECT
PROJECT FOR A COMMUNITY-TYPE SOCIETY
The Social System
SOCIETAL SPECIFICATION STANDARD

2. AURAVANA PROJECT
PROJECT FOR A COMMUNITY-TYPE SOCIETY
The Decision System
SOCIETAL SPECIFICATION STANDARD

3. AURAVANA PROJECT
PROJECT FOR A COMMUNITY-TYPE SOCIETY
The Material System
SOCIETAL SPECIFICATION STANDARD

4. AURAVANA PROJECT
PROJECT FOR A COMMUNITY-TYPE SOCIETY
The Lifestyle System
SOCIETAL SPECIFICATION STANDARD

5. AURAVANA PROJECT
PROJECT FOR A COMMUNITY-TYPE SOCIETY
The System Overview
SOCIETAL SPECIFICATION STANDARD

6. AURAVANA PROJECT
